

Advanced Continuing Education

Aesthetics Systems USA offers continuing education opportunities as either home-study or as a private class.

Seminars offered:

Modern Electrolysis Modalities (Approved for 0.2 CEUs)

Lecture length: 2 hours

This lecture will present an array of solutions available today for the treatment of different hair types, skin conditions and difficult cases by selecting the right modality while striving to reach definitive hair removal. You will learn about radiofrequency technologies of 13.56 and 27MHz combined with specific applications techniques to selectively destroy stem cells responsible for hair regrowth.

Maximizing Efficiency: Using the Right Probe (Approved for 0.3 CEUs)

Lecture length: 3 hours

This lecture will cover the different types of probes found on the market today. You will learn which type of probe is most appropriate for certain circumstances to best maximize your results.

Cell Destruction Study by Electroepilation & Photoepilation (Approved for 0.3 CEUs)

Lecture length: 3 hours

This lecture was prepared to have a better understanding of the dynamics between Photoepilation technologies versus the Electroepilation permanent hair removal methods. We will unveil scientific studies performed on skin biopsy with Laser as well as discover how modern Electroepilation technologies can outperform your permanent hairs removal treatments on all type of hair or skin without limitation.

Electrolysis After-Care and Home-Care (Approved for 0.2 CEUs)

Lecture length: 2 hours

This lecture will cover the types of aftercare treatments that may be performed following electrolysis as well as home-care and their importance to the healing process.

How to Market Your Electrolysis Practice (Approved for 0.2 CEUs)

Lecture length: 2 hours

This marketing lecture will help you make the most of your resources to expand your business and increase your profits.

Clients' Consultation, a Must! (Approved for 0.1 CEUs)

Lecture length: 1 hour

The consultation is the first contact the Electrologist has with her clients and is the most important step in establishing a professional relationship with your client. This lecture covers the importance of a good consultation.

Performing Advanced Electroepilation (Approved for 0.5 CEUs)

Lecture length: 5 hours

This all encompassing lecture will cover the finer points of performing electrolysis on various areas of the body. In an effort to ascertain a more effective treatment we will talk about appropriate modalities, probes, positioning and special recommendations that pertain to each specific area.

Positioning and Insertion Techniques (Approved for 0.3 CEUs) + Workshop (Approved for 0.3 CEUs)

Lecture length: 3 hours + optional workshop 3 hours

This lecture will emphasize the importance of proper positioning in order to increase the efficiency of your electrology treatments.

Working on Intimate Areas (Approved for 0.3 CEUs) + Workshop (Approved for 0.3 CEUs)

Lecture length: 3 hours + optional workshop 3 hours

This lecture will emphasize the importance of proper positioning in order to increase the efficiency of your electrology treatments specifically when working on intimate areas.

Thermolysis or Blend? Make the Right Choice Every Time (Approved for 0.15 CEUs)

Lecture length: 1.5 hours

Most Electrolysis devices on the market offer the possibility to perform Thermolysis and Blend treatments. While some work exclusively with Thermolysis, others swear only by Blend to remove all hairs. The modern Electrologist however is able to identify the right technique according to different factors that she evaluates prior to the treatment. These specific factors and situations will be presented in this lecture enabling you to obtain the perfect efficiency/comfort ratio every time.

Simple Guidelines for a Safe and Comfortable Working Environment (Approved for 0.15 CEUs)

Lecture length: 1.5 hours

Of course, the main reason a client comes to an Electrology institute is to get rid of their hair. However, clients also come to get pampered in a friendly, comfortable and clean place. This lecture will present simple but effective guidelines that will help you create a welcoming environment and control hygienic issues

The 5 Most Difficult Cases in Electrolysis and How to Handle Them (Approved for 0.15 CEUs)

Lecture Length: 1.5 hours

Even as an experienced Electrologist, you have certainly encountered several difficult cases during your career. Pulling hair, low results, strong regrowth are among these problematic situations that make you scratch your head. In this lecture, we will present the 5 most difficult cases in Electrolysis and expose the best way to approach them.

Customized Private Classes and Consulting

If you are looking for a class topic that is not covered in the topics above, you may contact us personally and we will create a class for you! We are also available via Skype and Facetime for any questions you may have. The pricing rate is shown below.

Rates – Private Classes

	Per Hour	Half-day (3 hours)	Full-day (6 hours)
One person/ online consulting	\$100.00	\$250.00	\$450.00
Two people	\$85.00 pp	\$200.00 pp	\$360.00 pp
Three People	\$75.00 pp	\$175.00 pp	\$300.00 pp
Four people *max	\$60.00 pp	\$130.00 pp	\$210.00 pp

*pp: price per person
